SUMMARY

Full-stack software engineer experienced in building and shipping production-ready applications across the frontend and backend. I'm a full-stack developer with a performer's mindset: skilled at staying focused when things break before production, driven by empathy for the end-user, and adept at translating creative vision into functional, elegant systems.

SKILLS

- Languages & Frameworks: TypeScript, JavaScript, Java, Python, React, Vue.js, Spring Boot
- Backend & Data: PostgreSQL, Supabase, SQL, JDBC, RESTful APIs
- Cloud & Tools: AWS, Git, GitHub, Postman, CI/CD fundamentals
- Testing & Workflow: JUnit, Agile methodologies, VS Code, IntelliJ

EXPERIENCE

Solutioneers • Full-Stack Software Engineer (Jan 2025 – Present) • Remote

- Own full development lifecycle of production features — database schema design, React (TypeScript) implementation, and deployment.
- Led redesign of reporting system, restructuring backend queries and relational models to deliver clean, filterable reports.
- Resolved release-blocking defects across frontend and backend layers to restore production stability.
- Contributed to architecture decisions balancing rapid iteration with long-term maintainability.

Celebrity Cruises • Team Lead (Jun 2019 – Nov 2022) • International

- Led 20-person international team, owning scheduling, performance standards, and operational execution.
- Maintained strict deadline accountability in high-pressure live production environments.
